LIGHT CLINIC

Magic Fingers

Prepared for Meta by Light Clinic
All material copyright 2025 Light Clinic
info@light.clinic

Magic Fingers lets you create, shape, and manipulate spectacular particle systems with your hands. Use intuitive gestures to form glowing orbs of energy, stretch streams of light between your fingertips, and swirl shimmering clouds that react instantly to your movements. Sculpt, guide, and play with particles in midair as your space becomes an interactive canvas and your hands become the tool.

VR
MR
SOCIAL

Core Features

Intuitive Hand Control – No controllers needed

Gesture Spells – Learn signature hand combinations to unlock unique effects and visual phenomena

Mixed Reality Magic – Effects blend seamlessly with your real environment or transport you to pure VR spaces

Social Creation – Invite friends to co-create spectacular displays together in real-time

Music-Responsive Visuals – Sing, play music, or use built-in soundtracks to make everything pulse and flow with rhythm

Gaze-Powered Forces – Where you look matters. Direct energy, launch projectiles, shape reality with your eyes

META INTEGRATION

Magic Fingers will be designed from the ground up for Meta's ecosystem, using Meta's tools.

Showcase Platform Capabilities

Magic Fingers demonstrates Quest's **hand tracking**, **mixed reality**, and **social** features. It's a flagship demo for what Meta's hardware can do.

Retention & Engagement

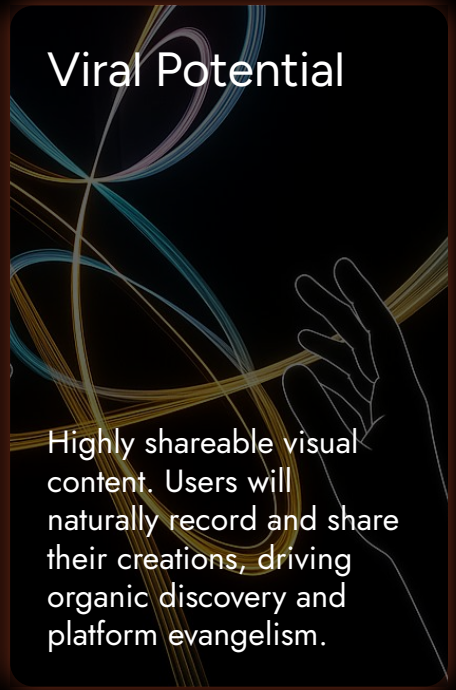

Magic Fingers' open-ended creative play drives repeated sessions and word-of-mouth growth. Like Cosmic Sugar, it has a chance to become a timeless classic.

Horizon Worlds Integration Opportunity

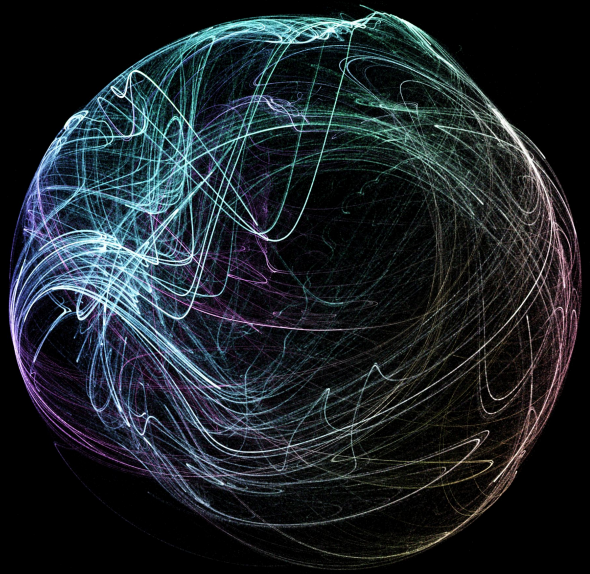

The core technology could become a creation tool within Horizon, giving users "magic hands" to build and perform together. Imagine user-generated worlds where creators can offer unique gesture-based experiences.

Viral Potential

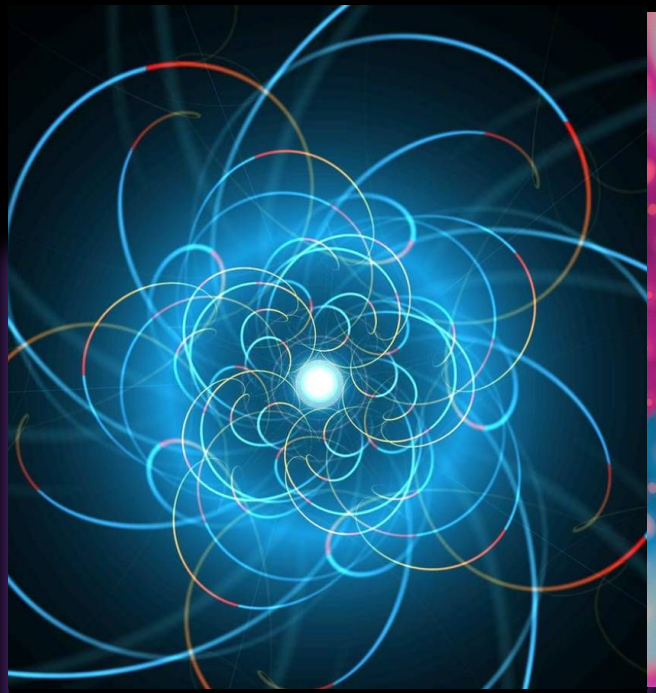

Highly shareable visual content. Users will naturally record and share their creations, driving organic discovery and platform evangelism.

From the Creator of

Cosmic Sugar

Bend Cosmic Forces in a universe of particles.

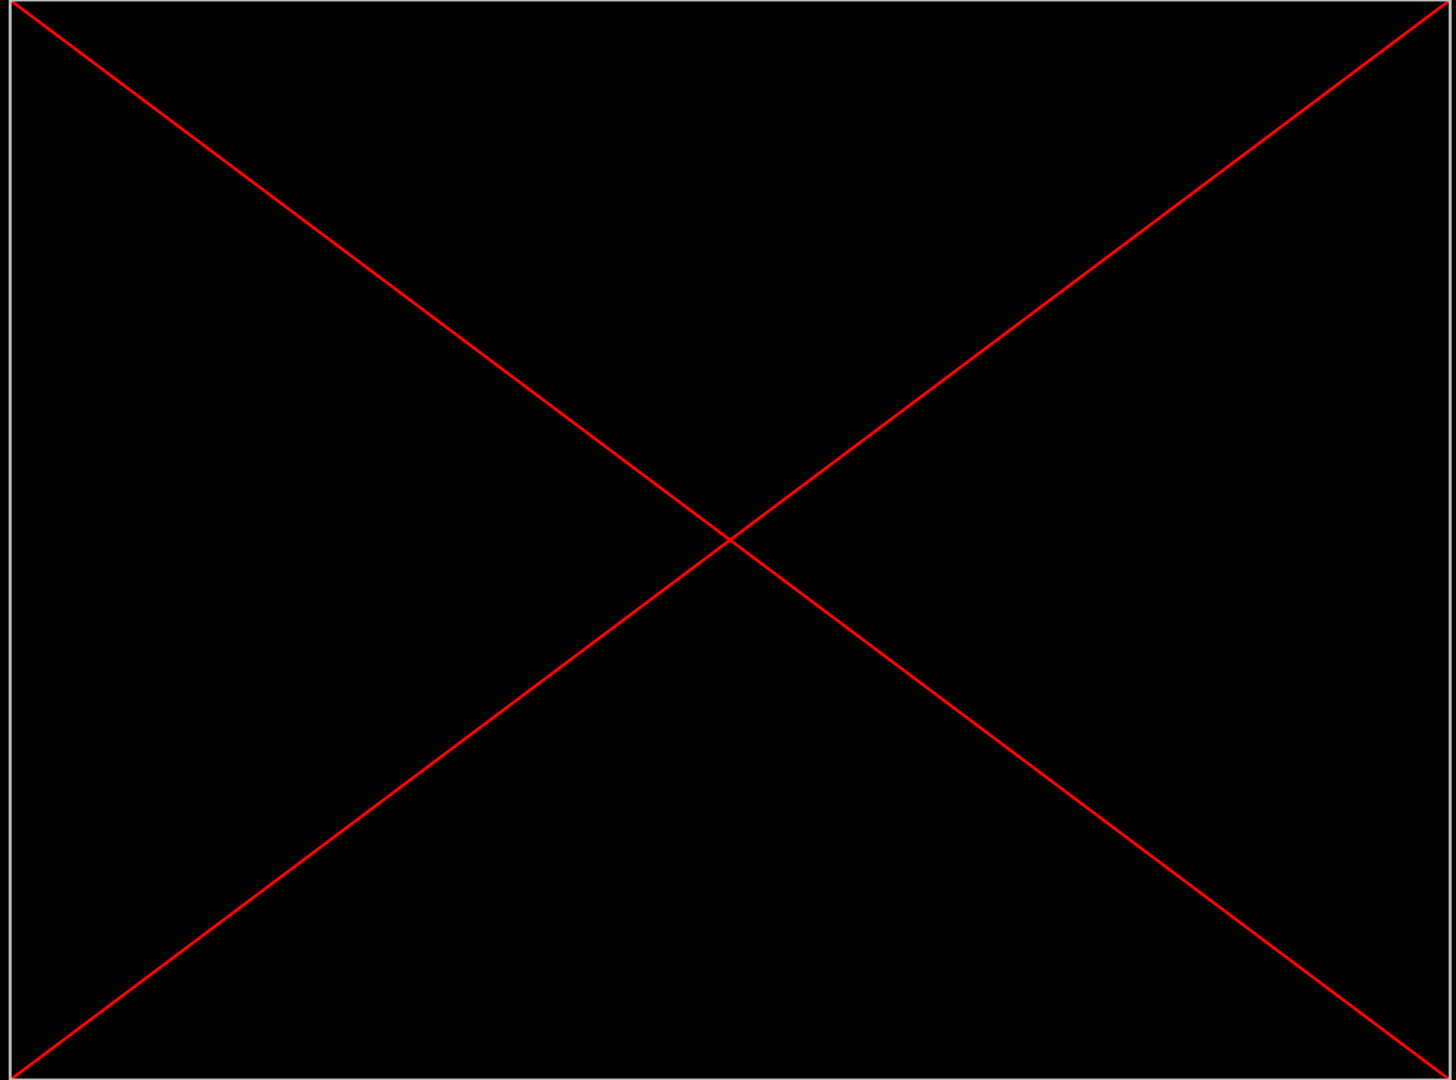

Visitations

Meditative environments for clinical uses

Brain Candy

Multisensory rhythmic stimulation for altered states

LIGHT CLINIC
VIDEO REFERENCES

These videos were created with real-time particle simulations and represent just a small sampling of the wide variety of effects of Magic Fingers.

LIGHT CLINIC

Light Clinic has delivered VR projects for Samsung, HTC, Google, The Economist, H&M, ATAI Life Sciences, among others.

We bring deep expertise in both commercial VR development and neuroaesthetic design, creating experiences that are technically robust and emotionally resonant.

http://light.clinic

We have a strong focus on neuroaesthetics and the healing potential of art and music.

BUDGET

Investment Breakdown: $500,000 Total

Visual Effects Development & Optimization
$150,000

- Particle system development and performance optimization
- Multiple visual style creation (galaxies, light trails, creatures, mandalas, volumetric clouds)
- Mixed reality passthrough effects
- Quest hardware optimization for smooth 72-90fps performance
- Advanced shader development and visual polish

Gesture Recognition & Interaction Systems
$60,000

- Hand tracking integration and gesture detection
- Eye tracking and gaze-based force systems
- "Spell" gesture library and recognition
- Haptic feedback integration
- Gesture refinement and accessibility options

User Interface & Experience Design
$70,000

- UX research and testing
- Onboarding experience design & tutorial
- Menu systems and mode selection
- Accessibility considerations
- Multiple user testing rounds and iteration

Multi-User Networking Implementation
$60,000

- Synchronization systems for shared experiences
- Server infrastructure setup and scaling
- Friend invite and lobby systems
- Performance optimization for multiple users
- Network reliability and latency handling

Audio-Reactive Systems & Music Integration
$40,000

- Microphone input processing and reactivity
- Audio analysis algorithms for visual mapping
- Built-in music playlist curation/licensing
- Sound design and audio feedback
- Music-to-visual synchronization

Recording/Sharing Features
$25,000

- Mixed reality video capture
- Social media export functionality
- In-app replay and screenshot systems
- Highlight reel auto-generation

Marketing & Community Growth
$60,000

- Launch campaign and influencer partnerships
- Social media content creation and management
- Community building and Discord/social presence
- Press outreach and media kit development
- User-generated content campaigns

Contingency & Testing
$35,000

- Bug fixes and polish
- Platform submission and certification
- Extended user testing phases
- Unexpected technical challenges
- Post-launch support buffer

PHASED DEVELOPMENT

Phases can be funded individually. Each delivers a complete, releasable experience. Market fit will be validated between phases.

Phase 1: Core Magic MVP
$75,000 *Releasable VR experience*

Pure VR with hand tracking and 2-3 signature particle effects (galaxies, light trails, creatures). Perfect the fundamental "casting magic" feel. Similar feature set as Cosmic Sugar.

Phase 2: Mixed Reality + Content
$100,000 *MR feature update*

Transform real rooms into magical canvas via passthrough. Add 4-5 new effects (mandalas, clouds, ribbons). Add gesture recognition where combinations of gestures cast special effects. Audio reactivity. Recording and local replay system.

Phase 3: Social Creation
$85,000 *Multiplayer update*

2-4 players collaborate in real-time. Synchronized effects, friend invites, avatar hands. Social video capture for sharing collaborative moments.

Phase 4: Community & Discovery
$90,000 *Content expansion*

15+ total effect types. Save favorite spell combinations. Social media integration with auto-generated highlight reels. Licensed music playlists. Accessibility features.

Phase 5: Launch & Growth
$75,000 *Marketing campaign*

Influencer partnerships, community building, press outreach. User-generated content campaigns. Live content updates and seasonal effects.

Phase 6: Platform Integration
$75,000 *Advanced features*

Horizon Worlds integration OR performance/choreography mode with persistent creations and advanced audio tools. Deep Meta platform feature integration.

Thank You!
